Headline: Net Asset Value(s)

15 July 2020

GCP Infra, the only UK listed fund focused primarily on investments in UK Infrastructure debt, announces that as at close of business on 30 June 2020, the unaudited net asset value per ordinary share of the Company was 107.73 pence, a decrease of 1.9% on the net asset value per ordinary share of 109.83 pence at the end of the previous quarter.

The net asset value takes into account cash, other assets, accrued liabilities and expenses and leverage (if any) of the Company attributable to the ordinary share class.

The Company's Valuation Agent, Mazars LLP, carries out a fair market valuation of the Company's investments on behalf of the Board on a quarterly basis. The valuation principles used by the Valuation Agent are based on a discounted cash flow methodology. A fair value of each asset acquired by the Company is calculated by applying an appropriate discount rate (determined by the Valuation Agent) to the cash flow expected to arise from each asset respectively.

A number of the Company's investments rely on projected future UK electricity market prices for a proportion of their revenues. Changes in electricity prices may therefore impact on a borrower's ability to service debt or, in cases where the Company has stepped into projects and/or has direct exposure through its investment structure, impact on overall returns. On 29 May 2020 the Company published an updated portfolio sensitivity to electricity prices as part of its half-yearly financial report, in which the Directors noted that in the medium term the Company expects Covid-19 to have a negative impact on electricity prices resulting from reduced demand for energy.

At the end of the quarter ended 30 June 2020, the medium-term electricity price forecasts used by the Company declined by a further c.5.5%. The impact of these changes in electricity forecasts has reduced the Company's net asset value per ordinary share at 30 June by 1.75 pence.

Notes to the Editor

About GCP Infra

GCP Infra is a closed-ended investment company and FTSE-250 constituent whose shares are traded on the main market of the London Stock Exchange. Its objective is to provide shareholders with regular, sustained, long-term distributions and to preserve capital over the long term by generating exposure to UK infrastructure debt and related and/or similar assets. The Company primarily targets investments in infrastructure projects, with long term, public sector-backed, availability-based revenues. Where possible, investments are structured to benefit from partial inflation protection. GCP Infra is advised by Gravis Capital Management Limited.
